ASSEMBLY INSTRUCTIONS FOR #2472

Remove the allen bolt and washer from the bottom pole. Once removed attach the lower components in order as shown.

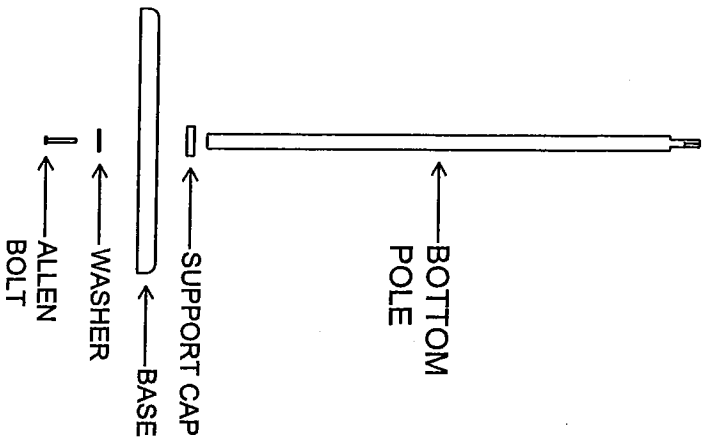

Attach both support bars to the top pole using the allen screws. Do not fully tighten the screws as you will need to adjust their position to connect the spiral extension.

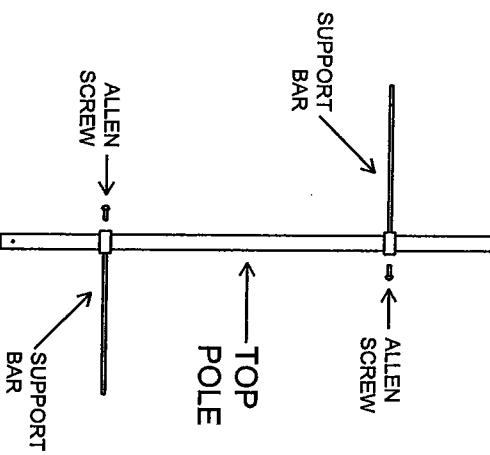

Connect the spiral extension to the two support bars. Now, fully tighten both the allen and phillips screws. Finally, attach the top pole to the bottom pole. Once connected turn the top pole either clockwise or counter clockwise until it is locked into place.
